

Project Description

Nelson & Pope, in conjunction with Nelson, Pope & Voorhis, secured permits from the New York State Department of Environmental Conservation and Village of Sands Point to construct a stone revetment, stairway and catwalk for access to Long Island Sound. N&P prepared construction plans and details which included a bridge section of the catwalk that spanned a length of approximately 25 linear feet. During construction, N&P and NP&V provided services including on-site observations, coordination with Village of Sands Point, and responding to requests for information from contractor.

Relevant Project Components

- Topographic Surveying
- Boundary Surveying
- NYSDEC Wetland Permitting
- Village Permitting
- Stone Revetment and Catwalk Plans
- Permit Plans
- Tree Removal Plan
- Buffer Restoration Planting Plan
