Project Description

Nelson & Pope performed topographic survey and prepared site improvement plans for the construction of a new parking area, including site grading and drainage, site alignment, utility relocation and segmented block gravity retaining wall. We also assisted in processing of Town and County approvals and represented the client before Town.

Relevant Project Components

- Topographic Existing Conditions Survey
- Site Improvement Plan
- Site Demolition Plan
- Site Utility Relocation Plan
- Gravity Retaining Wall
- Processing with Town and County
- Environmental Assessment Form (EAF)
