

Project Description

Nelson & Pope provided civil and site engineering, LEED Compliance Certification and construction observation and support services for a new Geometry and Physics Building, located in the vicinity of the Math & Physics Building at the SUNY Stony Brook Main Campus. The new building consists of seven (7) stories and contains approximately 41,650 SF. The project incorporated numerous measures for sustainable development and Best Management Practices for Stormwater Disposal and Control.

Relevant Project Components

- Civil Engineering
- Site Design
- Grading, Drainage & Utility Design
- Storm water Collection and Disposal
- Water Service Design
- Sanitary Disposal System Design
- Natural Gas Supply
- Parking Lot Reconstruction
- Concrete Retaining wall Design
- Construction Observation
- Construction Support Services
- LEED Compliance Certification
