

## *Project Description*

Nelson & Pope prepared site improvement plans for a proposed addition with revised parking layout for the Villa Maria Convent, located in the Bronx. Project components included site grading and the design of stormwater drainage facilities and a cellular confinement system instituted for erosion control measures, controlling water flow over steep slopes.

## *Relevant Project Components*

- Grading and Drainage Design
- Utility Layouts
- Erosion Control
- Zoning Research
- Parking Layout Design
- Cellular Confinement System
